EXPERIENCE

Consultant(Fullstack Developer), UN ECASStats 

01/2025 – Present

- **Modernized the internal statistical platform** by migrating a legacy .NET Framework codebase to **.NET Core (Clean Architecture)** and **Vue.js**, enabling the efficient processing and storage of millions of UN data records.
- **Engineered a composable visualization tool** that empowers statisticians to execute complex SQL aggregations and dynamically generate charts, maps, and data stories from diverse datasets.
- **Optimized the public-facing ECASStats portal** by leading a complete architectural refactor from Client-Side Rendering (CSR) to **Server-Side Rendering (SSR)**. Executed comprehensive file migrations and code cleanup, significantly improving load times and SEO performance.

Tech Stack: Vue, Nuxt.js, Typescript, .NET Core, RESTful APIs, SQL/NoSQL databases.

Frontend Developer, Prompt Engineer, A2SV AfroChat 

02/2023 – 10/2024

- Developed an AI-powered Telegram mini-app featuring image/document processing and a chatbot, leading to a substantial increase in user numbers.
- Co-built Next.js admin dashboard for real-time KPI tracking (growth/engagement metrics).

Tech Stack: React, Next.js, TypeScript, Tailwind CSS, Redux Toolkit, RTK Query, Python.

PROJECTS

Med Ethiopia, Next.js, React and Firebase

10/2022 – 07/2023

Developed a centralized health platform to digitize patient records and provide researchers with structured clinical data. The system features a public-facing statistical dashboard and was adopted by the NGO Empowerment For Development (ED) .

Chat-Room, Java, socket programming and Networking

- Developed a real-time chat system supporting 1:1 and group messaging.
- Integrated AES, Triple DES, and OTP algorithms to encrypt text/image data end-to-end.

EDUCATION

BSc, Electrical and Computer Engineering,

09/2017 – 07/2023

Addis Ababa University

Competitive Programming, Africa to Silicon Valley (A2SV) 

12/2021 – 12/2022

A2SV bridges the gap between African talent and global innovation by upskilling high-potential software engineers through rigorous training in algorithms, data structures, and system design.

KEY ACHIEVEMENT

⚡ **Atrons** 

Won **\$8,000** by co-developing *Atrons*—a **campus resource-sharing platform** (books, devices, notes).

⚡ **A2SV Hackathon Mentor** 

- Mentored 3 teams in Africa's largest AI hackathon; led one team to the Top 8 finals out of 1,118 teams.

⚡ **STEM Education Volunteer**

- Gave summer courses in Math, Physics, and Programming to senior high school students, leading to successful national exam passes and STEM placements.
